

The Environment

Environmental Policy Statement

All of **Aztec Construction** operations and activities will comply with this Environmental Policy Statement, relevant Statutory Laws and Regulations.

All premises, operations and activities conducted under the management control of **Aztec Construction** has resolved to, wherever possible, use products and work practices which minimise risk to employees and clients, limit emissions and waste and minimise potential damage to the environment.

Particular areas of attention include the following:

- The reduction, and where practicable elimination, of hazardous materials and the safe handling, storage, transportation and disposal of such materials.
- The minimisation and control of solid waste by the use of recycling and recovery programmes wherever possible.
- The monitoring and control of noise emissions, at both temporary and permanent sites where our staff are employed, to be within authorised limits and best practicable performance.
- The monitoring and maintenance of company vehicles to maximise fuel economy and minimise emissions.
- Establishment of contingency plans for dealing with incidents that could adversely affect the environment.
- The monitoring of work activities to ensure awareness of employees to conduct these activities in an environmentally responsible matter.

All employees are aware of this policy and are encouraged to recommend action the company can adopt to increase our positive approach to environmental issues.

Signed (Electronically)

Martin Price Managing Director

15th May 2008

As a responsible organisation we have undertaken an audit against the various laws and regulations governing the environment including:
